Add AI instructions

Add AI instructions

Table names and field descriptions don't always capture your organization's business rules and terminology. In this section, you write AI instructions that provide Copilot with business context, including key terminology, analysis preferences, and data scope.

1. In the Prep for AI dialog, select **Add AI instructions** from the left navigation.
2. In the instructions text box, enter the following business context:

Code Copy

```
This model contains retail sales data for an outdoor recreation products company.  
  
Key business terminology:  
- "Revenue" and "sales" refer to the Total Sales measure.  
- Products are organized by Category and Subcategory.  
  
Analysis guidance:  
- When users ask about "top products," rank by Total Sales descending.  
- When users ask about profitability, use the Profit Margin measure (percentage), not the Profit measure (absol  
- Customers are identified by CustomerName, not CustomerKey.  
  
Data scope: This model covers retail sales from January 2024 through December 2025.
```

3. Select **Apply** and then **Close** to return to the **Report** view.
