

DP-600 : Implement analytics solutions using Microsoft Fabric

Exercise 6 : Transform data using dataflows in Microsoft Fabric

- **Create a workspace**
- **Create a Lakehouse**
- **Create a Dataflow Gen2**
- **Apply Power Query transformations**

DP-600 : Implement analytics solutions using Microsoft Fabric

Create a workspace

The screenshot shows the Microsoft Fabric console interface. On the left is a navigation pane with icons for Home, Workspaces, Copilot, OneLake catalog, Monitor, Real-Time, Workloads, dimensional model_5, My workspace, and Fabric. The main area displays a 'Welcome to Fabric' message and a 'Create a workspace' dialog box. The dialog box has the following fields and options:

- Name ***: Transform_data_dataflow. A green checkmark indicates 'This name is available'.
- Description**: Describe this workspace.
- Domain ①**: Assign to a domain (optional).
- Learn more about workspace settings**: Link with an external icon.
- Workspace image**: Upload or Reset buttons.
- Advanced ^**: Expandable section.
- Contact list ***: rsidvika (Owner).
- Workspace type ①**: What a user can do in a workspace depends on the individual user license(s) assigned to that user and the workspace type. [Learn more](#).
- Power BI only workspace types**: Power BI workspaces only support the use of Power BI capabilities.
- Buttons**: Apply and Cancel.

WS name: Transform_data_dataflow

DP-600 : Implement analytics solutions using Microsoft Fabric

► Apply Power Query transformations

The screenshot shows the Microsoft Fabric Power Query interface. A 'Choose columns' dialog box is open, allowing the user to select columns to keep. The dialog lists the following columns:

- ☒ (Select all)
- ☐ SalesOrderID
- ☒ OrderDate
- ☒ CustomerID
- ☒ LineItem
- ☐ ProductID
- ☒ OrderQty
- ☒ LineItemTotal

The background table shows data with columns: SalesOrderID, OrderDate, CustomerID, and LineItemTotal. The status bar at the bottom indicates 'Completed (1.72 s) Columns: 7 Rows: 99+ Default destination: DataFlow_LH Not run'.

The screenshot shows the Microsoft Fabric Power Query interface. A 'Filter rows' dialog box is open, allowing the user to apply filter conditions to the rows in the table. The dialog shows the following filter condition:

Keep rows where "OrderQty" is greater than 0

The background table shows data with columns: OrderDate, CustomerID, OrderQty, and LineItemTotal. The status bar at the bottom indicates 'Completed (1.35 s) Columns: 5 Rows: 99+ Default destination: DataFlow_LH Not run'.
